01

PROFILE

Marketing operations and customer experience leader with 17 years of international corporate experience spanning CRM and lifecycle marketing, customer platforms, business analysis, technology, technical support, project management, digital delivery and people leadership. Most recently at GenDigital/Norton, leading teams and operations supporting large-scale global customer engagement programmes.

Experienced in building and leading distributed teams of up to 20 specialists, while driving operational delivery, process improvement and cross-functional programmes across Marketing, Product, Engineering, Analytics and UX/UI. Combines strategic leadership with hands-on experience in Agile/Scrum delivery, project management, business analysis and CRM technology.

Brings a distinctive combination of commercial, technical, operational and creative experience, supported by a background in graphic/web design and UX/UI and practical experience applying AI and automation to modern workflows. Comfortable operating as both a people leader and senior individual contributor, translating business and customer needs into practical solutions that improve customer experience and business performance.

02

EXPERIENCE

MAR 2023 — JUN 19 T 2025

GEN DIGITAL / NORTON

Manager — Email Platform

Prague

Lead global lifecycle marketing operations supporting Norton customer engagement programmes reaching millions of customers worldwide.

Lead, hire and develop distributed teams of up to 20 specialists, with responsibility for onboarding, performance management, resource planning and capability development.

Own day-to-day operational delivery and performance across a large-scale customer engagement environment, maintaining campaign delivery standards, quality and platform scalability.

Drive cross-functional initiatives with marketing, product, engineering, analytics and business stakeholders to improve customer experience and operational efficiency.

Lead operational reviews and stakeholder discussions, communicating priorities, performance, risks and improvement opportunities to support decision-making.

Introduced AI-assisted workflows to improve content generation, campaign execution and team productivity.

Contributed to proof-of-concept initiatives involving Braze, Iterable, Snowflake and Hightouch, supporting evaluation of future platform and data capabilities.

APR 2022 — MAR 2023

MERKLE

Business Analyst

Prague

Led requirements discovery and analysis, translating business and customer needs into functional requirements and scalable Salesforce-based customer engagement solutions.

Acted as the bridge between business stakeholders and technical delivery teams, working across Product, Engineering, UX/UI and CRM to translate requirements into actionable solutions.

Created and refined user stories, acceptance criteria, process requirements and functional specifications, ensuring requirements were clear, testable and understood by development teams.

Contributed across the Agile/Scrum delivery lifecycle, including backlog refinement, sprint planning, prioritisation, stakeholder reviews and delivery coordination.

Collaborated with UX/UI teams on customer journeys and digital experiences, balancing user needs, business requirements and technical feasibility.

02 EXPERIENCE CONTINUED

SEP 2016 — DEC 2020

INFOR

Support Consultant & Analyst

Prague

- Delivered advanced technical and application support for enterprise ERP environments, diagnosing complex software, data and system issues for international business customers.
- Performed root-cause analysis and technical troubleshooting using SQL, application logs, debugging tools and system data to investigate and resolve complex incidents.
- Managed customer issues across the full support lifecycle, from investigation and replication through escalation, resolution and stakeholder communication.
- Collaborated with Engineering, Product and Development teams to reproduce defects, analyse technical problems and support software fixes and product improvements.
- Completed specialist Infor ERP systems training in Stockholm, Sweden, strengthening technical and functional knowledge of enterprise applications and business processes.
- Translated complex technical findings into clear explanations and practical customer solutions, combining technical investigation with strong B2B customer support.

2009 — 2016

EARLIER ENTERPRISE TECHNOLOGY & OPERATIONS

IBM · Hewlett Packard · Motorola · Ariba

Prague

- Built seven years of enterprise technology, technical support and operations experience across major global organisations including IBM, Hewlett Packard, Motorola and Ariba.
- Developed practical expertise in networking fundamentals, connectivity and technical troubleshooting, diagnosing hardware, software, network and system-related issues.
- Worked with Motorola Canopy telecommunications technology, developing knowledge of wireless networking and telecommunications environments.
- Completed Motorola Six Sigma training, applying structured approaches to problem-solving, process improvement, quality and operational efficiency.
- Worked across technical support, customer operations and enterprise technology environments, supporting business-critical systems and services for international customers.
- Collaborated with international and cross-functional technical teams, escalating complex issues, communicating solutions and supporting effective service delivery.
- Built the technical and operational foundation for later progression into Business Analysis, Agile delivery, CRM technology, project delivery and operational leadership.
